

Here is your new computer!

Your new computer has been provisioned for your use. Please follow the three steps below to begin using your new computer.

1. Login with your temporary password

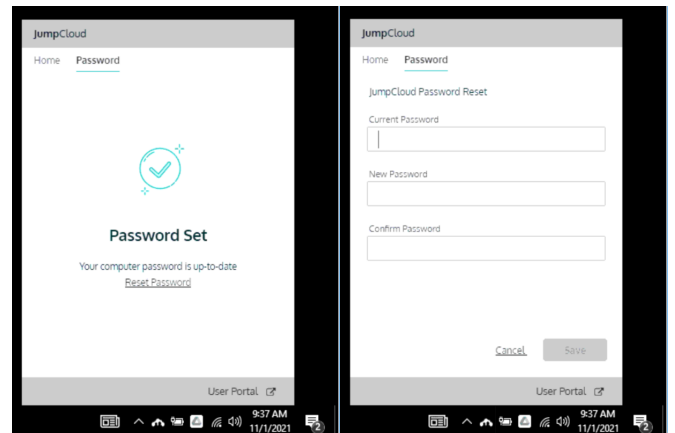

Your temporary password is '_____', you *may* need to reset it before or shortly after you log in.

2. Reset your password

Once you are signed in and your apps are working, you can reset your computer password with the JumpCloud app. Click the little icon  down near the clock, click the 'reset password' link and then enter your current (temporary) password, and your desired password in the 'new' and 'confirm' password boxes.

NOTE: Your password must meet the complexity requirements, follow the prompts for help.

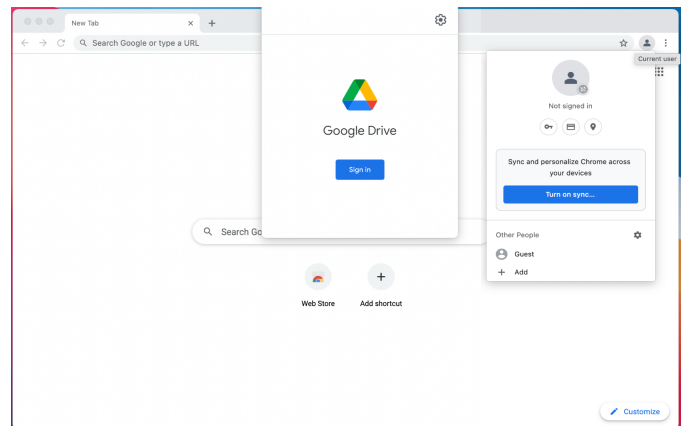

3. Sign in to your accounts

In order to use your computer, you will need to sign-in to your Google account in both Chrome and Google Drive as seen below.

4. What if you only use a mobile?

Then here is a video on how to reset your password using <https://console.jumpcloud.com>
<https://share.descript.com/view/3LTzYZb6TWw>

Enjoy your new computer!
